

Pexa Ltd Environmental Policy Statement

Pexa is responsible for achieving good environmental practice and operating in a sustainable manner.

We are therefore committed to reducing our environmental impact and continually improving our environmental performance as an integral part of our business strategy and operating methods.

It is our priority to encourage our customers, suppliers and stakeholders to do the same.

In support of these aims we will:

- Promote and develop products, processes and services which have progressively lower environmental impacts and encourage our suppliers and customers to adopt them. Evaluate new products, processes and services for their environmental impact.
- Take care of our own location ensuring that we minimise the risk of our own impacts on the environment including waste.
- Know what regulations apply to our business and ensure that we comply or exceed their requirements at all times.
- Measure, manage and reduce our carbon footprint and consumption of energy, fuel and natural resources.
- Develop a formal environmental management system that allows us to identify, evaluate, manage and reduce our environmental impacts.
- Participate in an externally monitored environment management programme that achieves 3rd party accreditation.
